

Reflections

of the Vista Irrigation District

Fall 2026

Welcome to your new bill

We have updated our water bill statement to make it easier to find important information at a glance.

Two charges have been renamed.

New Consumption History Graph provides easy access to recent water use history.

New Payment Summary Section shows important billing information in one spot.

Landscape Makeover Advice

from a Landscape Contest Winner

Each year, the Vista Irrigation District joins with other local water agencies to sponsor a contest to recognize outstanding water-wise residential landscapes in the San Diego region. In July, the Vista Irrigation District Board of Directors recognized Heidi and Martin Leonard as the district's 2026 WaterSmart Landscape Contest winners.

Mr. and Mrs. Leonard moved from the Las Vegas area to their current residence in 2022. The home that they purchased in Vista came with an unhealthy lawn and overgrown shrubbery, and upon moving in, the Leonards knew that they wanted to make a change. Doing most of the work themselves, they removed the unattractive lawn and outdated irrigation system in the front yard and replaced it with a new drip system and a whole new landscape design.

District staff asked the Leonards if they had advice for homeowners looking to make similar upgrades their own landscape, and they highlighted three things.

Get a Rebate - The process was easy to follow and straight forward, and allowed us to put our own design together that met the rebate program's criteria. We did most of the work on our own but we did have a tree removal company take out long overgrown trees. The rebate helped us with the cost.

Use Resources - Look at pictures of what others have done. Visit the WaterSmart SD landscape resources page (QR Code Below); you will find info on everything you need: irrigation, landscape design, soil amendment, and plant choices.

Take Time Planning - Be thorough. Take your time. Take advantage of the resources the WaterSmart program offers both online and in person to help you choose water efficient plants, the right irrigation, and tools to design your yard.

For residential landscaping resources and rebates visit www.WaterSmartSD.org or scan the QR code.

To see more photographs of the Leonards' winning landscape and other regional winners, please visit the WaterSmart Landscape Contest at www.landscapecontest.com
